

# simply Munich

## Destination Information

### Information for Coach and Bus Operators

In the city centre within the Altstadttring (Old Town beltway) there are no parking facilities for tour buses. There are, however, some central arrival and departure zones to drop off and pick up passengers. For long-term parking, buses must use one of the parking facilities provided for this purpose. All of them are well connected to the public transportation network.

**Please note:** Munich has a **low emission zone**. Thus high-emission vehicles are no longer allowed to drive into the city **within the Mittlerer Ring** (middle beltway). Details can be found on the following link:

[www.environmental-badge.co.uk](http://www.environmental-badge.co.uk)

### Parking areas to the outskirts (outside the low emission zone)

Munich provides two bus stations on the outskirts of the city center suitable for long-stay parking. Both are located within proximity to the highway network and are well connected to the public transportation network. They are situated outside the low emission zone and can be used without registration. Considering the limited number of parking spaces, especially in Messestadt Ost, a registration is recommended. Payment for the bus parking spaces is made on site.
